Valley Line LRT

Keeping pace with Edmonton's growth as a world-class city through sustainable public transportation

Location

- Edmonton, AB

Client

- City of Edmonton

Anticipated Completion

2027

Collaborators

- AECOM
- Hatch
- ISL Engineering
- Marigold Infrastructure Partners
- Mott MacDonald
- TransEd Partners

DIALOG Services

- Architecture
- Electrical Engineering
- Mechanical Engineering
- Planning & Urban Design
- Structural Engineering

A catalyst for city-shaping and the development of transit oriented communities, the Valley Line LRT will eventually stretch from Edmonton's southeast all the way to the west end through Downtown. Twenty-seven extra kilometres of light rail transit means Edmontonians will be able to further connect to the places where they live, work, and play. DIALOG, as part of the ConnectEd Transit Partnership (CTP), is acting as the Owner's Engineer for the Valley Line LRT to provide project/program management, consulting services (structural, mechanical and electrical engineering, urban design, architectural design) for preliminary design, engineering services for the procurement of two P3 consortia, and design reviews. The Southeast stage is set to open in 2022, and the West stage is set for 2027.
